SUMMARY

B.S. Software Engineering student at MSOE with a Computer Engineering minor and hands-on experience across full-stack development, embedded systems, and team-based agile projects. Proficient in TypeScript, Python, C/C++, and Java, with a track record of delivering polished, user-centered applications. Proven ability to balance technical coursework with leadership responsibilities.

EDUCATION

B.S. Software Engineering | Computer Engineering Minor | Milwaukee School of Engineering | GPA: 3.78
| Expected May 2027

PROJECT EXPERIENCE

Raider Connect (Team of 5): Design and implement a mobile application in TypeScript to help college students discover campus events and navigate their university environment.

- Architected and implemented a relational database schema to efficiently store and query event, location, and user data
- Developed a RESTful API layer with modular interface functions to retrieve and manage data from a Supabase backend
- Translated user stories and stakeholder requirements into intuitive, user-centered UI screens across the full application flow
- Collaborated with the product owner through iterative feedback cycles to refine features and align deliverables with project goals

Wordle-- (Team of 4): Create a remake of Wordle in Java employing agile methodology and GitLab to aid in collaboration.

- Utilized GitLab to create and product backlog issues (PBIs) for smaller sprint projects
- Delegated PBIs and sub-tasks to members of the team with GitLab to organize responsibilities
- Integrated event handlers for individual letter inputs as well as whole words to allow for user interaction
- Designed admin UI to see most and least guessed words with JavaFX to analyze user behavior patterns
- Designed dynamic user UI in Android Studio for android compatibility on other devices

Japanese Kana Keyboard: Develop an embedded system in C that emulates a Japanese smartphone keyboard with a 4x4 keypad and a rotary encoder.

- Map each key to a Japanese kana row (あ, か, さ, etc.), backspace, enter, modifier, and punctuation.
- Incorporate the rotary encoder to scroll through characters families and confirm selections
- Display current text input on an LCD or OLED screen
- Implement dakuten (゛) and handakuten (゜) modifier support for voiced consonants

TECHNICAL SKILLS

- | | | | |
|----------|-------------------|-----------|-------------------|
| • Java | • Java/TypeScript | • Git | • Agile Process |
| • Python | • C/C++ | • Quartus | • Embedded Design |

CO-CURRICULAR INVOLVEMENT | COMMUNITY SERVICE

Secretary | MSOE Rock Climbing Team | September 2023 - Present | 6 hrs per week

Volunteer Judge | Adventure Rock | October 2023 - Present | 3-4 hrs per competition
